

- 1.) What kind of sensors are used in autonomous (or driverless) cars?
Check the internet, and find out what kind of information is captured by sensors used in today's driverless cars and how this information is used. Report your findings in a few paragraphs.
- 2.) What senses do you use when you walk?
- 3.) What sensors are you using when grasping an object? Enumerate them all. Which ones are absolutely necessary for good performance?
